DETAILED ACTION

Response to Amendment

A new restriction is being filed by the examiner due to a preliminary amendment filed by the applicant that cancelled claims 1-29 and 34-40 and claims 30-33 and 41-57 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 45-57, drawn to sensor housing apparatus, classified in class 604, subclass 533.
- II. Claims 30-33 and 41-44, drawn to method of measuring flow, classified in class 73, subclass 1.16.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the invention of group I can be applied to measure flow in areas other than in a human as stated in method for measuring claims 30-33 and 41-44. It can be used to measure flow in pipes.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

If the applicant decides to elect the apparatus claims (claims 45-57). The applicant must elect one of the following species:

Species 1: Figure(s) 1
Species 2: Figure(s) 2A and 2B
Species 3: Figure(s) 3
Species 4: Figure(s) 4
Species 5: Figure(s) 5A and 5B
Species 6: Figure(s) 6A and 6B
Species 7: Figure(s) 7
Species 8: Figure(s) 8

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

Art Unit: 3772

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
